

ANKITA GAWDE

Senior UX & Product Designer

ankita.k.gawde@gmail.com | +1 (708) 413-1986 | [linkedin.com/in/ankita-gawde](https://www.linkedin.com/in/ankita-gawde) | ankitagawde.com | Chicago, IL

SUMMARY

Senior UX & Product Designer with 8+ years of experience and an engineering background that sharpens how I design — technically fluent, collaboration-first, and precise in execution. Specialising in AI-powered clinical tools, enterprise healthcare workflows, and WCAG 2.1 AA-conformant design systems — shipped across 10+ products for enterprise clients (10,000+ users). Actively use AI tools (Claude, ChatGPT) to accelerate prototyping, research synthesis, and interaction spec generation.

EXPERIENCE

CITIUSTECH

Healthcare Technology Consulting | Chicago, IL & Mumbai, India

Lead UX Designer — AI & Healthcare Products

Oct 2024 – Present

Chicago, IL

- Led UX strategy and interaction design across 10+ AI-powered clinical platforms serving enterprise healthcare clients (10,000+ users).
- Redesigned complex clinical workflows for time-pressured users — usability testing showed noticeable reduction in task errors and navigation steps across multiple rounds of iteration.
- Architected UX patterns for AI-generated outputs across 3+ product lines — including confidence indicators, system state communication, and human-in-the-loop validation flows that drove user trust and adoption in regulated clinical environments.
- Built and maintained a WCAG 2.1 AA-conformant design system of 100+ components — adopted across multiple product teams, accelerating delivery consistency at scale.
- Partnered with cross-functional teams of engineers, PMs, and clinical SMEs across agile delivery cycles — shipping high-fidelity UX across 10+ client products without sacrificing craft or pace.
- Applied AI tools (Claude, ChatGPT) for rapid prototyping, interaction spec generation, and UX research synthesis — accelerating design exploration and reducing time from insight to decision.

Senior UX Designer — AI & Healthcare Products

Jul 2021 – Oct 2024

Chicago, IL

- Owned end-to-end UX design across 10+ healthcare and enterprise platforms — progressing from full delivery ownership to leading design strategy across research, interaction design, and design systems.
- Led cross-functional design reviews with engineers and PMs, translating complex clinical requirements into accessible, task-first interfaces for enterprise users (10,000+).
- Established reusable interaction patterns and contributed 50+ components to the shared design system — reducing design inconsistencies across product teams.
- Conducted usability testing and heuristic evaluations across multiple product lines — iterating designs until task success rates noticeably improved across rounds.
- Designed accessible, WCAG 2.1 AA-conformant interfaces for mobile-first healthcare applications — balancing clinical accuracy with intuitive, low-friction UX.

UX Designer — Healthcare & Enterprise Products

Mar 2019 – Jun 2021

Mumbai, India

- Drove end-to-end UX research — user interviews, contextual inquiry, and usability testing — across healthcare and enterprise products, transforming findings into validated interaction models.
- Designed responsive, accessible interfaces for mobile-first healthcare applications across web and native platforms.

- Contributed foundational patterns to a shared design system, improving cross-team consistency and accelerating design-to-dev handoff across multiple product lines.
- Delivered UX across the full product lifecycle — from 0-to-1 greenfield products to iterative improvements on scaled platforms.

UX Engineer

Apr 2017 – Mar 2019

Mumbai, India

- Hybrid engineering and UX role — owned both design and front-end development of healthcare and enterprise software, building the technical foundation that shapes my UX practice today.
- Designed and developed user interfaces end-to-end — bridging UX design and front-end implementation (HTML, CSS, JavaScript) to ship polished, functional products.
- Build technical fluency that directly informs how I write interaction specs, prototype in code, and collaborate with engineers.

E14 TECHNOLOGIES PVT. LTD.

Pharma Technology | Mumbai, India

UX Engineer

Jan 2015 – Mar 2017

- Full-ownership engineering role at a pharma-technology firm — responsible for the entire product stack: UX design, embedded software development, QA, and on-site implementation for regulated pharma machinery.
- Designed and built operator interfaces for pharma-grade equipment — applying UX principles in regulated environments where precision, error prevention, and user safety are non-negotiable.
- Owned the full development cycle: UX design → embedded software development → testing → on-site deployment — developing systems thinking that directly informs every design problem today.

SKILLS

UX & Design Tools: Figma, Miro, Axure RP, InVision, Sketch, Adobe XD, Adobe Illustrator, Photoshop

AI & Prototyping: Claude (Anthropic), ChatGPT, Cursor — rapid prototyping, interaction spec generation, UX research synthesis, and AI-assisted design exploration

Methods: User Research, Usability Testing, Heuristic Evaluation, Journey Mapping, Information Architecture, Interaction Design, Design Systems, Wireframing, Prototyping, UX Writing, Stakeholder Management, Agile/Scrum

Domain: Healthcare IT, AI/ML Product Design, Enterprise SaaS, Regulated Environments, WCAG 2.1 AA Accessibility, Clinical Workflow Design, Human-in-the-loop AI

EDUCATION

Master of Computer Applications (MCA)

Jun 2015

University of Mumbai — Computer Software Engineering

Bachelor of Computer Science (B.Sc.)

Jun 2012

University of Mumbai

CERTIFICATIONS

Google UX Design Professional Certificate - Coursera

Conducting Usability Testing - Coursera

Become a UX Designer from Scratch - Coursera
